

Exp No. -2 Create a simple cloud software application for Property Buying & Rental process (In Chennai city) using any Cloud Service Provider to demonstrate SaaS

Done by: Juhi Surin

Register no.: 192525148

Aim:

To develop a cloud-based SaaS application for property buying and rental management in Chennai using Zoho Creator.

Procedure:

1. Log in to Zoho Creator and create a new application named CloudNest – Property Buying & Rental System.
2. Create a form called Property_Details and add all the required fields.
3. Configure dropdown values for Property Type, Location, and Availability.
4. Create an On Success workflow using Deluge to display messages based on the property type and price.
5. Enter sample property records and submit the form to store the data.
6. View the saved records in the report and verify that the workflow executes successfully, demonstrating a cloud-based SaaS application.

Implementation Steps:

Step 1: Log in to Zoho Creator and create a new application.

Step 2: Create a form named Property_Details and add the required fields.

Step 3: Configure the dropdown fields for Property Type, Location, and Availability.

Step 4: Create an On Success workflow using Deluge to process property details and display messages.

Step 5: Enter sample property records and submit the form to store the data in the cloud.

Step 6: Open the report, verify the stored records, and test that the workflow executes successfully.

Output:

1. Form

The screenshot shows the Zoho Creator Form Builder interface for a 'Property Request Form'. The left sidebar contains a palette of field types: Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, and Drop Down. The main workspace displays a form with the following fields: Customer Name, Phone Number, Email ID, Property Type, Requirement, Preferred Area, Budget, Bedrooms, and an 'Additional Requirements' field with a text area and a trash icon. The right sidebar shows the 'Field Properties' for the selected 'Additional Requirements' field, including options for Field name, Field link name, Validation (Mandatory), Data Privacy (Contains personal data), User Input (QR code, Barcode), and Visibility. The bottom status bar indicates a trial expires in 9 days and provides links for Upgrade, Get started faster, and Help.

2. Workflow

The screenshot shows the Zoho Creator Workflow Builder interface for a 'Property Request Form'. The left sidebar contains a palette of actions: Condition (if, else if, else, conditional if), Data Access (add record, fetch records, aggregate records, update record, update multiple fields, for each record, delete records), and Miscellaneous. The main workspace displays a 'Deluge Script' for the 'Property Request Form' workflow. The script contains the following code:

```
1 info "Property Request Submitted Successfully!";
2 alert "Thank you " + input.Customer_Name + "! Your property request for " + input.Requirement + " has been received.";
3
```

The bottom status bar indicates a trial expires in 9 days and provides links for Upgrade, Get started faster, and Help.

3. Report

Customer Name	Phone Number	Email ID	Property Type	Requirement	Preferred Area	Budget
Rahul Srinivasan	+919012345678	rahul.s@gmail.com	House	Buy	OMR	6500000
Priya Sharma Sharma	+919123456789	priya.sharma@gmail.com	Villa	Rent	Velachery	35000
Arun Kumar Kumar	+919876543210	arun.kumar@gmail.com	Apartment	Buy	Anna Nagar	8500000

Result:

The cloud-based Property Buying & Rental Management System was successfully implemented in Zoho Creator.
