

Exp No. -5 .Create a simple cloud software application for product selling using any cloud service provider to demonstrate saas.

Done by: Juhi Surin
Register no.: 192525148

Aim:

To develop a cloud-based Product Selling System using Zoho Creator (SaaS) to enable customers to purchase products online.

Procedure:

1. Log in to Zoho Creator and create a new application named Product Selling System.
2. Create a Product Order Form with customer and product details.
3. Add fields for quantity, price per unit, and total amount.
4. Create a workflow to calculate the total amount automatically.
5. Add an On Success workflow to display an order confirmation message.
6. Test the application by placing sample product orders.

Implementation Steps:

1. Create the Product Selling System application in Zoho Creator.
2. Design the Product Order Form with all required fields.
3. Configure dropdowns, number, currency, and payment fields.
4. Add Deluge workflows for total amount calculation and order confirmation.
5. Enter sample order details and submit the form.
6. Verify that the total amount is calculated correctly and the order is stored successfully.

Output:

1. Form

The screenshot shows the Zoho Creator Form Builder interface for a 'Product Order Form'. The interface is divided into three main sections: Basic Fields, Field Properties, and a bottom status bar.

Basic Fields: This section contains a grid of field types that can be added to the form. The available fields are:

- Name
- Email
- Address
- Phone
- Single Line
- Multi Line
- Number
- Date
- Time
- Drop Down

Field Properties: This section shows the properties for the selected 'Customer Name' field. The properties include:

- Field name: Customer Name
- Field link name: Customer_Name
- Validation: ☐ Mandatory
- Display Fields: ☐ Prefix, ☒ First Name, ☒ Last Name, ☐ Suffix
- Data Privacy: ☐ (unchecked)

Bottom Status Bar: This bar contains a chat icon, a 'Here is your Smart Chat (Ctrl+Space)' message, a trial expiration notice 'Trial expires in 9 days | Upgrade', and a 'Get started faster! Help' link.

2. Workflow

The screenshot shows the Zoho Creator Workflow Builder interface for a 'Deluge Script'. The interface is divided into three main sections: Condition, Data Access, and Client Functions.

Condition: This section contains a list of conditions that can be added to the workflow. The available conditions are:

- if
- else if
- else
- conditional if

Data Access: This section contains a list of data access actions that can be added to the workflow. The available actions are:

- add record
- fetch records
- aggregate records
- update record
- for each record
- delete records

Client Functions: This section contains a list of client functions that can be added to the workflow. The available functions are:

- focus

Deluge Script: This section contains the script code for the workflow. The script is as follows:

```
1 Input.Total_Amount = input.Quantity * input.Price_Per_Unit;
2 Info "Order Placed Successfully!\n\nTotal Amount: ₹" + input.Total_Amount;
3
```

Bottom Status Bar: This bar contains a chat icon, a 'Here is your Smart Chat (Ctrl+Space)' message, a trial expiration notice 'Trial expires in 9 days | Upgrade', and a 'Get started faster! Help' link.

3. Report

Product Selling System

Product Order Form

Product Order Form Report

Product Order Form Report

Customer Name	Phone Number	Email ID	Product Name	Product Category	Quantity	Price Per Unit
Rahul S	+919012345678	rahul@gmail.com	Headphones	Accessories	3	1500
Priya Sharma	+919123456789	priya@gmail.com	Smart Watch	Accessories	2	4500
Arun Kumar	+919876543210	arun@gmail.com	Laptop	Electronics	1	55000

Showing 3 of 3

Result:

Thus, a cloud-based Product Selling System was successfully developed using Zoho Creator (SaaS), enabling customers to purchase products online with automatic total amount calculation and order confirmation.
