

Exp No. -2 Create a simple cloud software application for Property Buying & Rental process (In Chennai city) using any Cloud Service Provider to demonstrate SaaS

Done by: Juhi Surin

Register no.: 192525148

Aim:

To develop a cloud-based SaaS application for property buying and rental management in Chennai using Zoho Creator.

Procedure:

1. Log in to Zoho Creator and create a new application named CloudNest – Property Buying & Rental System.
2. Create a form called Property_Details and add all the required fields.
3. Configure dropdown values for Property Type, Location, and Availability.
4. Create an On Success workflow using Deluge to display messages based on the property type and price.
5. Enter sample property records and submit the form to store the data.
6. View the saved records in the report and verify that the workflow executes successfully, demonstrating a cloud-based SaaS application.

Implementation Steps:

Step 1: Log in to Zoho Creator and create a new application.

Step 2: Create a form named Property_Details and add the required fields.

Step 3: Configure the dropdown fields for Property Type, Location, and Availability.

Step 4: Create an On Success workflow using Deluge to process property details and display messages.

Step 5: Enter sample property records and submit the form to store the data in the cloud.

Step 6: Open the report, verify the stored records, and test that the workflow executes successfully.

Output:

1. Form

The screenshot shows the Zoho Creator Form Builder interface for a property buying and rental process. The interface is divided into three main sections: Basic Fields, Field Properties, and a bottom status bar.

Basic Fields: This section contains a grid of field types on the left and a list of fields on the right. The field types include Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, and Drop Down. The fields listed on the right are Property_ID, Property_Name, Owner_Name, Owner_Phone, Property_Type, Location, Price, Bedrooms, Bathrooms, and Area_sqft.

Field Properties: This section allows you to configure the properties of a selected field. The properties include Field name (Created_Time), Field link name (Created_Time), Validation (Mandatory, No duplicate values), Initial value (HH:mm:ss), Allowed Hours (None), and to (None).

Status Bar: The bottom status bar shows the trial expires in 10 days, an upgrade button, and a help button.

2. Workflow

The screenshot shows the Zoho Creator Workflow Builder interface for a property buying and rental process. The interface is divided into three main sections: Condition, Data Access, and Client Functions.

Condition: This section contains a list of conditions: if, else if, else, and conditional if.

Data Access: This section contains a list of data access actions: add record, fetch records, aggregate records, update record, for each record, and delete records.

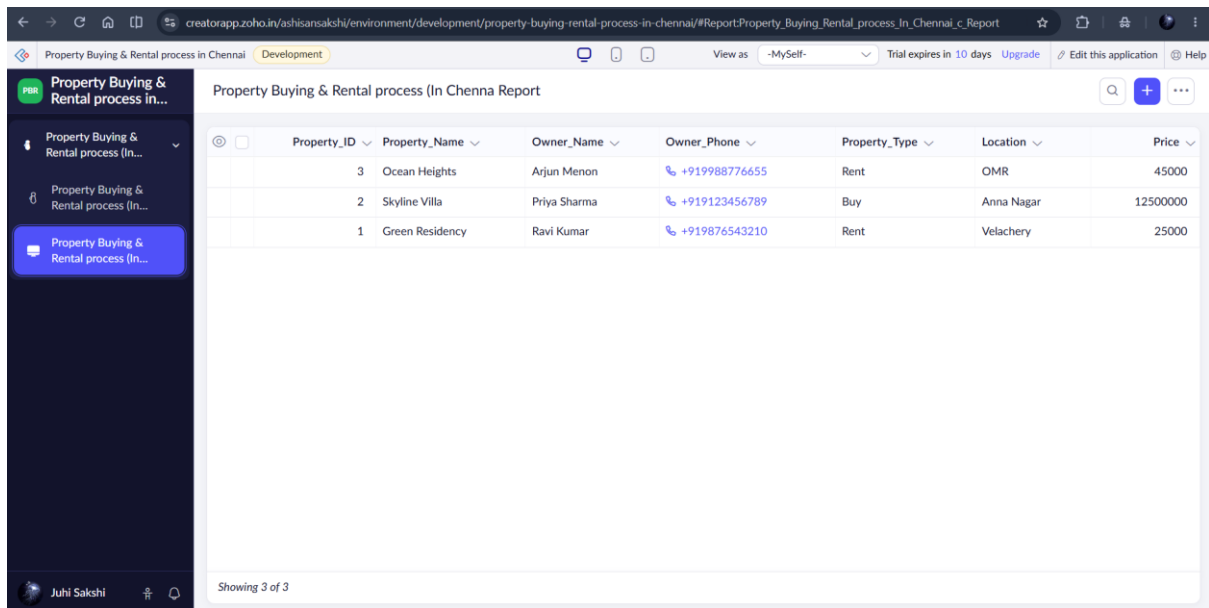

Client Functions: This section contains a list of client functions: focus.

Deluge Script: The Deluge Script section contains a script that checks the property type and price, and then performs actions based on the results. The script is as follows:

```
1 if(input.Property_Type == "Rent")
2 {
3   info "Rental property listed successfully.";
4 }
5 else if(input.Property_Type == "Buy")
6 {
7   info "Property for sale listed successfully.";
8 }
9
10 if(input.Price >= 10000000)
11 {
12   info "Property Category: Premium";
13 }
14 else
15 {
16   info "Property Category: Standard";
17 }
18
19 openUrl("#Report:Property_Details_Report","same window");
```

Status Bar: The bottom status bar shows the trial expires in 10 days, an upgrade button, and a help button.

3. Report

Property Buying & Rental process (In Chennai Report)

Property_ID	Property_Name	Owner_Name	Owner_Phone	Property_Type	Location	Price
3	Ocean Heights	Arjun Menon	+919988776655	Rent	OMR	45000
2	Skyline Villa	Priya Sharma	+919123456789	Buy	Anna Nagar	12500000
1	Green Residency	Ravi Kumar	+919876543210	Rent	Velachery	25000

Showing 3 of 3

Result:

The cloud-based Property Buying & Rental Management System was successfully implemented in Zoho Creator.
