

Exp No. -3 Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS.

Done by: Juhi Surin

Register no.: 192525148

Aim:

To develop a cloud-based Car Booking Reservation System using Zoho Creator (SaaS) that enables users to book cars online and automatically calculates the total booking cost.

Procedure:

1. Log in to Zoho Creator and create a new application named Car Booking Reservation System.
2. Create a Car Booking Form with fields such as customer details, car model, booking type, pickup location, number of days, and cost.
3. Add a workflow to calculate the Total Cost automatically based on the cost per day and number of booking days.
4. Configure an On Success workflow to display a booking confirmation message after form submission.
5. Enter sample booking details and submit the form to store the data in the cloud.
6. Verify that the total cost is calculated correctly and the booking confirmation is displayed, demonstrating the SaaS application.

Implementation Steps:

- Open Zoho Creator and create a new application named Car Booking Reservation System.
- Design a Car Booking Form by adding all the required fields.
- Configure the field properties, including dropdowns, date, number, and currency fields.
- Create a workflow to calculate the total booking cost and display a confirmation message.
- Publish the application and test it by entering sample booking details.
- Verify that the booking information is saved successfully and the workflow executes correctly.

Output:

1. Form

The screenshot shows the Zoho Creator Form Builder interface for a 'Car Booking Form'. The left sidebar contains a grid of field types: Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, Drop Down, Radio, and Multi Select. The main workspace displays a form with the following fields: Customer Name (highlighted), Phone Number, Email ID, Car Model, Booking Type, Pickup Location, Pickup Date, Number of Days, Cost Per Day, and Total Cost. The right sidebar shows the 'Field Properties' for the selected 'Customer Name' field, including options for Field name, Field link name, Validation (Mandatory), Display Fields (Prefix, First Name, Last Name, Suffix), and Data Privacy. The bottom status bar indicates a trial expires in 9 days and provides links for Upgrade, Get started faster, and Help.

2. Workflow

The screenshot shows the Zoho Creator Workflow Builder interface for a 'Car Booking Form'. The left sidebar displays a list of actions categorized into Condition, Data Access, and Client Functions. The main workspace shows a 'Deluge Script' editor with the following code:

```
input.Total_Cost = input.Cost_Per_Day * input.Number_of_Days;
```

 The right sidebar contains buttons for 'Update' and 'Cancel'. The bottom status bar indicates a trial expires in 9 days and provides links for Upgrade, Get started faster, and Help.

3. Report

Customer Name	Phone Number	Email ID	Car Model	Booking Type	Pickup Location	Pickup Date
Rahul S	+919012345678	rahul@gmail.com	Innova	With Driver	OMR	02-Aug-2026
Priya Sharma	+919123456789	priya@gmail.com	Creta	With Driver	Velachery	03-Aug-2026
Arun Kumar	+919876543210	arun@gmail.com	Swift	Self Drive	Chennai Central	31-Jul-2026

Result:

Thus, a cloud-based Car Booking Reservation System was successfully developed using Zoho Creator (SaaS), enabling users to book cars online and automatically calculate the total booking cost.
